WH-16

CNC 2POINT COILING MACHINE

Very Cost-effective 7-Axis 2-Point coiling machine Available for wire dia. 1.6mm at max.

High production speed, High precision, & Short setup time
Easy Programming with pre-installed application software dedicated to compression spring part

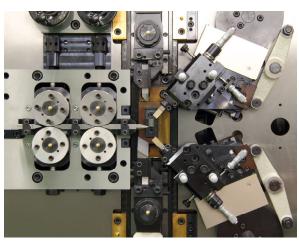

1-17-24 Kamiaoki-Nishi Kawaguchi-shi Saitama 333-0845 Japan TEL: (81) 48—256—3511 FAX: (81) 48—256—3595 http://www.oriimec.co.jp/ e-mail: info-spring@oriimec.co.jp

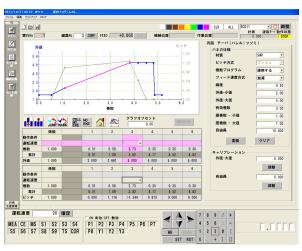

Features

- 7-Axis for Feed, Cut, Wedge-Pitch, 1st Point, 2nd Point, Push-Pitch, & Arbor back-and-forth equipped as standard.
- Twin-roller applied for feed can reduce feed pressure on wire material. Feed pressure can be managed with setup record unit (option).
- Easy switching to Rotary cut, Straight cut, or Wedge-Pitch by moving eccentric pin.
- Cut, Wedge-Pitch, and Arbor equipped on the center slide does not need to align arbor with cutting tool even if coil diameter is changed. Center slide position can be managed with setup record unit (option).
- No need to remove and reinstall point slide when changing winding direction.
- Program screen consists of all-axis always displayed and other cells movable by vertical scroll, and Program flow and each axis operation can be recognized with one look.
- Easy programming for pitch and outside diameter individually gives easy adjustment of compression spring. With line chart, adjustment work can be recognized visually.
- For variation of conical springs, straight, bowl and such shape can be formed adjusting in multi-step up to 100-step, and desired load can be achieved easily.
- Capacitance gage sensor comes with as a standard accessory. Production control can be done with auto-correction and multi-functional production control screen.
- Initial tension servo and Rotary point servo are applicable to 1st point and 2nd point at the options.

1st point & 2nd point

Having adjustment mechanisms for Rotaional direction along with Coiling pin in/out, Bobbing and Tilting movement.

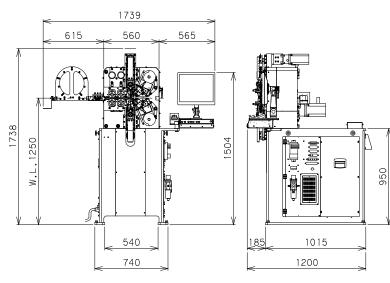

Pitch line chart on program screen

Standard Spec

Setting Pitch program and Outside dia. Program respectively makes adjustment of compression spring program easier.

Wire Dia.
